THE BEST PROTECTION FOR YOUR VITAL DATA MEDIA NOW WITH EXTRA CAPACITY

DATAPLUS

FIRE-RESISTANT DATA MEDIA PROTECTION

| EN 1047-1 | UL 72 | EN 14450 |
| S 120 DIS | Class 125 | S2 |

KEY FEATURES

- Easy slam action emergency closing in event of a fire.
- Generous capacity.
- High-quality media protection.
- Two-hour data media protection label. Tested to the highest international standards, UL 72 and EN 1047-1. DataPlus is certified as Class 125 2hrs with drop test by UL. EN Norm is certified by ECB•S in class S 120 DIS for fire resistance.

- Burglary protection in accordance with European norm EN 14450 and certified by ECB•S in security class S2.
- Easy to transport and install.
- Low weight ratio due to new advanced fire protection barrier material.
- Ability to customise by using internal fittings to optimise your storage capacity.
- Ability to base fix to the floor for effective prevention of physical removal.

- Removable front plate allows useage of a pallet loader for more efficient installation, reducing costs to the customer.
- The cabinet is fitted with a key lock as standard. However, you may require the monitoring of access to your sensitive data and therefore we have a series of electronic locks ranging from basic locking to more sophisticated audit trails.
- The cabinet is an attractive light grey which fits in well in most office interiors.

MO - R/W (magneto-optical disc)	157×143×16	62	122	F + S

FIRE TESTING

The data media cabinet DataPlus is tested and certified by ECB•S according to the European standard EN 1047-1 in class S 120 DIS for two hour's fire protection. The test is carried out in two parts.

.

FIRE TEST
STAGE 1
The cabinet is placed inside the furnace which is heated to a temperature of over 1000 °C.

STAGE 2
After 120 minutes in the furnace the burners are switched off. The inner temperature and humidity in the cabinet are continually monitored until the cabinet begins to cool. The cabinet remains in the furnace as the temperature returns to zero, then the cabinet is removed and opened. The maximum internal temperature inside the cabinet must not exceed 52 °C.

IMPACT TEST
STAGE 1
The cabinet is placed in a pre-heated oven for up to 45 minutes. Then the cabinet is removed and dropped 9.15 metres onto a bed of rubble.

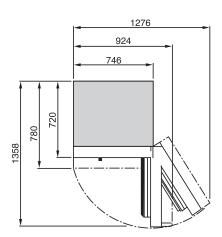

STAGE 2
The cabinet is then placed back into the furnace for up to another 45 minutes. As it cools inside the furnace, the cabinet's temperature is monitored before being removed and opened. The maximum internal temperature must not exceed 52 °C.
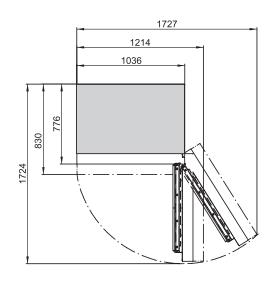

CONSEQUENCES OF A FIRE
The picture illustrates the devastation caused by a fire. Imagine what would be left of your vital data media if it were not stored in a Chubbsafes cabinet.
