

BUILT ACCORDING TO THE MOST STRINGENT ENVIRONMENTAL MANUFACTURING STANDARDS

DUOFORCE

Engineered to fulfil the exacting safe storage demands
of retail, bank and commercial managers

Chubb safes
Trusted the world over.

Combined protection against burglary and fire,
manufactured in the Netherlands.

THE CHUBBSAFES DUOFORCE

A robust safe for retail, commercial or banking use, DuoForce is Grade III certified by the ECB·S for both burglary protection and 60 minutes fire protection of paper documents. Produced in Doetinchem, this sturdy safe is built according to the most rigorous quality, health & safety and environmental manufacturing standards.

MADE IN THE NETHERLANDS

Trusted the world over, Chubb safes solutions have been providing people with protection for their cash and valuables globally for almost 200 years. Originating in the UK in 1835, today the brand is universally available.

Product prerequisites of a commercial, retail or banking safe storage solution

WHAT DOES A SAFE NEED TO OFFER?

PREMIUM SPECIFICATION

A specification that meets all insurance company, risk managers and underwriters' requirements, providing sufficient value cover to protect all cash takings and valuable documents.

STRAIGHTFORWARD OPERATION

An easy, secure and hassle-free solution that is simply installed and has an ergonomic operation.

VERSATILE RANGE

A flexible design to conveniently locate it where it is needed most and where space is often constrained.

PEACE OF MIND FOR YOU AND YOUR STAFF

DESPITE PREDICTIONS ABOUT THE DEMISE OF CASH, IT IS FAR FROM DEAD. Organisations may not hold as much as they used to, but it can still run into tens of thousands and must still be handled and secured.

The reduction in cash takings warrants fewer CIT collections, so retailers, commercial and financial establishments, all of whom still handle cash, must find ways to protect it until there are significant amounts to justify collection costs. CIT change deliveries must also be secured before being dispensed into tills. If you are a security specifier in the banking or retail sector and need to complete an operational security profile, DuoForce is the ideal high quality certified safe to secure cash and any critical paperwork you must protect.

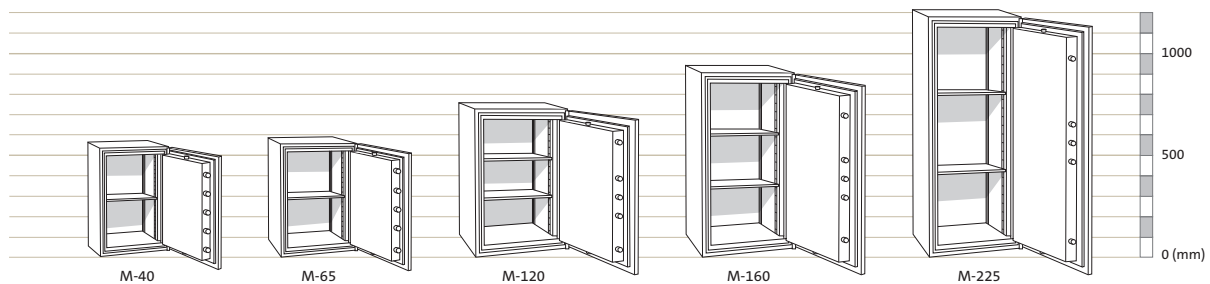

Introducing

THE DUOFORCE

DuoForce is independently tested and endorsed to meet the requirements of European Security standard EN 1143-1. This level of burglary protection is universally recognised by Insurers risk managers and under writers throughout Europe and beyond, ensuring the secured cash and change are kept safe.

Furthermore, DuoForce is tested by an independent, ISO 17025 accredited laboratory according to the NT Fire 017 – 60 Paper standard. The one-hour fire resistance ensures that should your premises burn down and the safe be engulfed in flames, all cash and documents kept within will be retrievable once the all clear is given.

The resulting certifications are issued and managed by ECB·S, widely acknowledged as Europe's leading certification body for safes, cabinets and strong rooms.

Available in 5 sizes and capacities. All sizes can be trusted to protect their contents not just against unauthorised forced burglary attack, but also against the extreme temperatures experienced during fire.

Considering that all certified safes weighing less than 1,000 Kg must be correctly anchored for insurance coverage, we always advise you call in specialists. Chubb safes channel partners are an international network of distributors and trained installers who will deliver, position and anchor a safe professionally and accurately.

DESIGN

Ergonomic soft-touch handle and a range of shelves to maximise storage capacity. Each option has **class leading low weights** compared to other Grade III certified safes from other manufacturers. Models 120 and above are wide enough to accommodate a standard till drawer.

LOCKING

Supplied with one key lock as standard, the option of a factory fitted electronic lock or optional two locks are also available. This gives **flexibility to customise** how DuoForce can be secured and operated.

INSURANCE RATING

The product construction and certification provide an **excellent cash and valuables Insurance rating**.

As an example, this would be £35,000 valuables or £350,000 cash in the UK.

WHAT MAKES DUOFORCE IDEAL FOR RETAIL, COMMERCIAL OR BANKING USE?

Independently tested by the Institute Giordano and by Gryfit Laboratories, DuoForce Grade III is **doubly certified** by the ECB-S and thus satisfies the demands of insurers, risk managers and under writers alike.

The smaller footprint of the M-40 model has been designed specifically to allow for easy positioning within space constrained areas i.e. a retail cash office, bank or commercial environment, enabling easier concealment and thus minimising discovery and potential loss.

Certified by DEKRA

MANUFACTURING CERTIFICATIONS

Sustainable development goals are increasingly important both to Chubb safes and to a wider audience.

We list sustainability very highly on our agenda, setting high standards for our products, our employee working conditions and for the environment in which we live.

DuoForce is manufactured under the most stringent of production environments in our advanced Doetinchem production facility, a factory that is ISO certified by DEKRA and demonstrates commitment to Gunnebo Sustainability Approach.

ENVIRONMENTAL GUARANTEE

ISO 14001: Environmental Management System certification makes sure that every safe is manufactured in a facility operating an environmental control policy. Materials and processes are closely managed and continually reviewed to reduce their impact upon the environment. All environmental issues relevant to operations are considered. Air pollution, water and sewage issues, waste management, climate change mitigation and adaptation are all regulated to ensure resources are used efficiently. Everyone purchasing a DuoForce safe does so secure in the knowledge that they are buying a product with the minimum amount of environmental impact.

MAINTENANCE OF A HEALTH & SAFETY STANDARD WITHIN PRODUCTION

ISO 45001: Occupational Health & Safety System guarantees that every action, every process within production is risk managed and fully compliant with health and safety regulations. When buying DuoForce, rest assured that it has been made with due consideration to those making the product. Their welfare and safety are at the forefront of our thinking.

PERFORMANCE GUARANTEE

ISO 9001: Quality Management System certification means every safe is built within a strictly controlled and monitored process. This, combined with our ECB-S certification, provides the customer with the confidence they deserve.

The dedicated European manufacturing approach is not only environmentally more friendly, it also ensures a more efficient, shorter and better supply chain for customers in Europe.

CHUBBSAFES DUOFORCE AT A GLANCE

The ideal, high end storage solution with both 60 minutes fire-resistance and certified grade III burglary certification, satisfying insurer, risk managers and under writers needs.

Available in 5 sizes and capacities with double certified combined protection.

More environmentally aware manufacturing.
